

# Renowned. Trusted. Minimally Invasive.

RIA Endovascular provides comprehensive, minimally invasive endovascular and interventional radiology evaluation and treatment. Our board-certified, fellowship-trained interventional radiologists perform procedures for local, national and international patients both in the hospital setting and in our offices located in the greater metro Denver area.

RIA Endovascular physicians are sought-after international speakers, clinical trial investigators and skilled practitioners who have performed more than 60,000 image-guided procedures. We are on call 24/7/365 for acute and emergency cases.

## RIA Endovascular Procedures

- Comprehensive Vein Care
- Interventional Oncology
- Women's Interventional Procedures
- Spinal Interventions
- Arterial Interventions
- Neurological Interventions
- General Interventional Radiology
- Acute Care – 24/7/365

## Consultations and Procedure Locations

### For in-office and hospital outpatient procedures:

- Patients are generally first seen for a consultation and evaluation at our office at 8200 E Belleview Ave, Suite 600E, Greenwood Village, CO 80111.
- Once precertification by our in-house specialist is complete, procedures are scheduled by our office staff.

**Hospital outpatient procedures** are performed at our partner hospitals within the various hospital systems in the region. Our interventional radiologists also perform procedures for hospital-admitted patients.

# RIA Endovascular Procedures

\* Procedures performed in the RIA Endovascular offices at 8200 E Belleview Ave, Suite 600E, Greenwood Village, CO 80111

## Comprehensive Vein Care

### Varicose Veins\*

Sclerotherapy – Cosmetic\*  
Foam Sclerotherapy\*  
Endovenous Laser Treatment (EVLT)\*  
Radio Frequency Ablation – RFA\*  
Ambulatory Phlebectomy\*  
Sapheon® Trial\*

### Blood Clots

Chronic Venous Reconstruction  
Stenting for May-Thurner Syndrome  
Catheter-Directed Thrombolysis  
& Thrombectomy  
Inferior Vena Cava (IVC) Filter Placement  
& Removal (Removal\*)  
Pulmonary Thromboembolism

### Gonadal Vein Embolization

Varicocele Embolization  
Pelvic Venous Congestion Syndrome  
Embolization

## Interventional Oncology

### Regional Therapies – Liver

Yttrium-90 Radioembolization  
Chemoembolization  
- Transarterial Chemoembolization (TACE)  
- Drug-eluting Beads  
Percutaneous Hepatic Perfusion (PHP)

### Local – Tumor Ablation

Cryoablation  
Irreversible Electroporation (IRE)  
Microwave Ablation  
Radiofrequency Ablation (RFA)

### Infusion Port Placement & Removal\*

## Women's Interventional Procedures

### Uterine Fibroid Embolization (UFE)

### Hysterosalpingogram (HSG)\*

### Ovarian Vein Embolization

### Post-Partum Hemorrhage Embolization

## Spinal Interventions

### Kyphoplasty

### Sacroplasty

### Vertebroplasty

### Spinal Pain Management

## Arterial Interventions

### Peripheral Artery Disease (PAD) Treatment

Angioplasty  
Stenting

### Abdominal Aortic Stent Graft

### Renal & Mesenteric Artery Angioplasty and Stenting

## Neurological Interventions

Neuro-interventional surgery is a separate division of our parent organization. They treat brain aneurysms, arteriovenous and spinal malformations, tumors, carotid stenosis, ENT disorders and stroke. Providers may contact the Neuro 24/7/365 Hotline at 866.862.9742. The Patient & Family Line is 720.493.3345.

## Acute Care – 24/7/365

### Acute Bleeding

### Massive Pulmonary Embolism

### Organic Obstruction With Sepsis

### Traumatic Injuries

## General Interventional Radiology Procedures

### Abscess and Fluid Drainage

Percutaneous abscess drainage – Computer tomography (CT) or ultrasound-guided

### Adrenal Vein Sampling

### Diagnostic Vascular Imaging

Ultrasound Studies

- Ankle Brachial Index (ABI)
- Arterial Doppler Ultrasound\*
- Venous Insufficiency Ultrasound\*
- Deep Venous Thrombosis (DVT) Ultrasound\*

CT Studies

- CT Angiogram
- CT Venogram

Other Diagnostic Studies

- Angiogram
- Venogram

### Kidney & Urological Interventions

Nephrostomy Tubes  
Ureteral Stents  
Varicocele Embolization

### Liver Interventions

Biliary Drainage & Stent Placement  
Cholecystostomy Drain (Gall Bladder)  
Transjugular Intrahepatic Porto-systemic Shunt (TIPSS)

### Peritoneal Drainage

Paracentesis  
Tunneled Peritoneal Catheter Placement

### Pleural Drainage

Thoracentesis  
Aspira®/PleurX® Tunneled Chest Catheter

### Vascular Access

Dialysis Access – Catheters  
Infusion Port Placement & Removal\*  
Tunneled Power Line  
Peripherally Inserted Central Catheter (PICC)
